

Chaitra Naik

+1-(206)-876-0712 | naik.ch@northeastern.edu | <https://www.linkedin.com/in/chaitra-naik/> | <https://chaitraanaik.github.io/>

EDUCATION

Northeastern University, Seattle, WA

MPS Analytics

June 2023

BV Bhoomaraddi College of Engg & Tech., Hubli, India

Bachelor of Technology in Computer Science GPA: 8.34

June 2014

EXPERIENCE

SAP Labs India, Bangalore, India

Feb 2019 - March 2021

Developer

- Automated a report for the procurement team using filters, parameters, and calculated sets that automatically qualified conversion rate by 17.8%
- Implemented Fiori application for Process Orders in Production Planning which involved details of the relationships between the phases of an operation which saw an improvement in the processing time by 20.2%
- Analyzed and developed a scalable tool called Client Copy to optimize the HANA database ensuring 10X faster operations compared to the old tool thereby reducing the downtime caused.
- Designed Tableau dashboard to track and monitor customer incidents that saw an improvement in the response time by 14.4%
- Handled optimization of ABAP programs using SQL trace, performance analysis and runtime analysis.

Tata Consultancy Services (TCS), Bangalore, India

Jan 2015 - Jan 2019

Associate System Engineer

- Used stored procedures, triggers, and views to structure data by combining millions of rows of data from 21 disparate data sources
- Analyzed and built data models to generate meaningful insights from customer data, boosting sales by 25%
- Created a real time reporting tool that standardized metrics across the team which saved around 220 hours of manual reporting.
- Worked with overseas clients to understand business requirements and translate those needs into actionable reports in Tableau, saving 16 hours of manual work each week

TECHNICAL SKILLS

- R programming, Python, SQL, Tableau, UI5, ABAP

CERTIFICATIONS AND TRAININGS

Trainings: Statistical Foundations, Tableau for Data Scientists; LinkedIn learning

ACADEMIC PROJECTS

- Exploratory Data Analysis on Ecommerce Mobile Dataset**
 - Worked on cleaning, analyzing, and exploring the data for a leading e-commerce mobile company based on several parameters such as Brand, Model, Color, Memory, Storage, Rating, Selling Price and Original Price, using R programming. The analysis involved generating meaningful business questions and answering them using visualizations.
- Exploratory Data Analysis on IMDB Dataset using TABLEAU**
 - Performed exploratory data analysis on IMDB dataset of around 5000 movies & series to draw conclusions about the factors that influence Rating of the Content using Tableau. (Tableau Profile - <https://public.tableau.com/app/profile/chaitra.naik>)
 - Conclusion – Among 6 factors, Content Type, No of Votes, Profanity, Nudity, Violence are the differentiable factors which decide the Rating of the Content. On an average, Series have a higher rating compared to Movies.
- Flight price detection using Python**

Used Linear Regression and ensemble models to determine the factors that affect the price of the flight with 90% accuracy rate.
- Exploratory Data Analysis for the show Shark Tank India using TABLEAU**

Interactive dashboard on the analysis of the show which helped answer the questions like, The Shark who turned to be the best negotiator across all the deals, industry-wise investment by the sharks, etc.
